LeetCode: Gen3s1s

Computer Engineering undergraduate (2027) with strong foundations in Data Structures, Algorithms, and Operating Systems. Hands-on experience building Linux systems and backend projects using C/C++, Python, and Node.js, with a focus on performance, reliability, and clean engineering practices.

PROJECTS

Intelligent Malware Detection & Behavior Analysis System

2025

Python, Linux, Procmmon, Scikit Learn

- Built an end-to-end malware detection system that combines static PE header analysis with dynamic behavior monitoring by running samples in a Procmmon sandbox.
- Created graphs from process interactions and system calls, then trained Logistic Regression and Random Forest models with scikit-learn reached >90% recall on malicious executables.
- Added a Streamlit dashboard that shows real-time risk scores and visualizes the suspicious behavior patterns.

Club Sphere — University Club Management App

2025

Kotlin, Jetpack Compose, Node.js, PostgreSQL

- Developed a full-stack Android app that lets university students discover clubs, join events, and manage memberships in one place.
- Built the backend with Node.js + Express on Supabase, added JWT authentication with BCrypt hashing, and made the dashboard load everything the user needs in a single API call.
- Designed a clean 3NF PostgreSQL schema with junction tables and SQL views so member counts and event stats stay fast and consistent.

PULSE — Linux CPU Power Manager

2025

C, Linux System Calls

- Created a Linux daemon in C that monitors runtime CPU load through system calls and automatically controls governor states.
- Implemented dynamic governor switching to drop power consumption by 95% in idle states while keeping the system fully responsive and stable.

ACHIEVEMENTS & CERTIFICATES

- Oracle OCI Professional Certified
- NPTEL Multicore Architecture
- IBM Python for AI
- freeCodeCamp Full Stack Development
- Global rank under 8000 on CodeChef
- Solved 150+ algorithmic problems on LeetCode

TECHNICAL SKILLS

Languages: C, C++, Java, Python, SQL

Core CS: Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks, OOP

Systems: Linux, Bash, POSIX System Calls, Multithreading, Socket Programming, GDB

Backend: Node.js, REST APIs, PostgreSQL, JWT Authentication

Tools & Concepts: Git, GitHub, Streamlit, System Design, Secure Coding

EDUCATION

B.Tech in Computer Science and Engineering

2023 – 2027

Graphic Era University

CGPA: 8.60/10

Relevant Coursework: Operating Systems, DBMS, Networks, DAA

Intermediate (Grade 12)

2021 – 2022

Delhi Public School

Percentage: 88% (Science & Mathematics)
